

Essential Notification System *ENS)))*

Do you want to instantly notify a team or group of people with a consist voice message?

Overview and Benefits

ENS provides rapid and automated delivery of emergency alerts, critical information and announcements, as well as a full voicemail recovery solution.

ENS includes powerful features to enhance both, everyday voice communications and in times of crisis. ENS provides these features to address the unique needs of public corporations, private businesses, schools, government, public safety, health care, community, volunteer organizations, and others.

Rapid Reliable Delivery of Voice and E-mail Messages

The ENS service provides rapid delivery of informative voice messages to cell phones, work phones, home phones, answering machines, voicemail, and e-mail. You simply record your message and launch your campaign by phone any time of the day or night.

Voicemail Recovery Solution

When your phone system or phone lines are inoperable, simply forward your phone numbers, which will allow ENS mirror your organization's extensions and DIDs. Voicemails are immediately delivered to your staff via e-mail as a standard .WAV attachment or can be easily retrieved from any phone.

TAMP Systems

Software as a Service (SaaS)

ENS)))

Powerful Call List Management and Group Membership

ENS can use your existing call lists from the applications you're most familiar with, such as Microsoft Excel, as well as industry standard formats, e.g., ASCII comma delimited, etc. You can also view, edit, search, add or remove contacts from your call lists right from your account with our list management tools. ENS provides powerful call list management with the ability to deliver individual voice messages to multiple teams or groups of recipients of any size with ease.

Security and Compliance with Regulatory Authorities

With ENS, you can rest assured that your information is secure. All customer data is securely transmitted using Secure Sockets Layer (SSL) to our secure data centers. This is the same level of security that is commonly used for online banking. In addition, automatic e-mails are generated for account activity.

Scalable, Affordable Monthly Plans

The ENS scalable pricing model allows you to pick the plan that meets your specific needs, regardless of the size of your organization. You pay only for successfully delivered calls and never pay for busy signals, transfers or non-answered calls. Pricing for ENS is similar to cell phone pricing plans.

Telephone and E-mail Support

Assistance and technical support available by e-mail and phone to help you quickly and easily take full advantage of the system.
