

TAMP Systems Announces - DRS 2012 v10.0

TAMP Systems is pleased to announce the latest enhancements for DRS:

- **New Feature:**

The DRS Incident Response/Disaster Management Module allows a user to execute their plan by linking their existing recovery tasks to the incident record. Recovery tasks can then be managed from within the incident record in the Module. This new feature will save time by having the guideline tasks readily available during a crisis.

- **Introducing the Hot Button:**

The DRS Hot Button will allow quick access to specific Plans. In the event of an emergency you want and need your plan fast. By clicking the Hot Button, your Recovery Plans are readily available. Users can also create their own Hot Buttons within DRS to create a one-click access to any plan within DRS.

- **Email Reports:** The DRS Report Management Module allows quick access to reports and the ability to email them directly to one or more users.
- **Updated Plan Templates:** DRS also includes updated and new additional plan templates.
- **Additional Enhancements:** DRS underwent many updates that include more robust features; for example, planners can now use longer file names, improved menus and improved search capabilities.
- **Coming Soon....**Smart Phone App to be released soon.

Contact us for free demo and/or training on how to use these new features!
